## 1. How to edit registration form required fields?

Edit file "[includes/settings\\_register.inc.php](#)"

Inside there you will find numerous fields which you can set to value 0 to turn them OFF.

When you set a field to 0, then that field will NOT appear in the registration form.

## 2. How to edit a certain backend setting?

Open the backend manual, press CTRL+F and search for the feature that you want to edit. You will then find details about the feature, where it can be found in the backend menu, etc.

## 3. How to edit the main page layout?

Go to backend, CONTENT MANAGEMENT -> WEB TEMPLATE MAP and click on any area that you want to edit. You will then find instructions related to which files you must edit or which backend sections you must visit in order to make changes to the requested layout area.

## 4. How to edit top menu and add new links, change bottom links, change logo and other frontend elements?

Check the backend page CONTENT MANAGEMENT -> WEB TEMPLATE MAP for more instructions

## 5. How to restart the casino?

Restarting the casino means to delete all the users, staffs, deposits, transfers, withdrawals and to reset the jackpots to 0. You can do this from backend, by visiting page MAINTENANCE -> RESTART CASINO.

## 6. I do not have time to manage the casino. What can I do?

You can hire a person to manage the casino. This person can be given an operator account and you can decide what privileges he has and which pages he can visit from the backend. You can create an operator account from backend STAFF MANAGEMENT -> CREATE OPERATOR. The operator will login using the same admin panel link: {yourdomain}/administrator/

You can configure the operator privileges from the backend CASINO SETTINGS -> STAFF ACCESS LEVELS.

We suggest that you grant to the operator only access to withdrawals, deposits, gameplays page, support tickets and list users. This way he can manage the casino without affecting any important functionality.

## 7. How to change the casino logo and the watermark from the games pictures?

Go to backend, CONTENT MANAGEMENT -> Theme settings and follow the instructions.

## 8. How to manually grant a bonus with rollover to a player?

You can do this by going to backend BONUSES AND CODES-> BONUS-FREE CHIPS ADD.

To do this from code, you may use the function "credit\_just\_bonus" explained in the Source Code Documentation, from file "[includes/bonusfc.inc.php](#)".

## 9. How to manually grant freespins to a player?

You can do this by going to backend GAMES MANAGEMENT-> FREESPINS-GIVE FS AS BONUS.

## 10. How to add tracking scripts or other scripts to the page?

Edit section named "**footer\_tracking**" from backend CONTENT MANAGEMENT->LAYOUT SECTIONS.

## 11. How to add a new page to the casino?

Use the backend feature “CONTENT MANAGEMENT”->“Add Page” and then go to “CONTENT MANAGEMENT”->“CONTENT PAGES LIST” and add the HTML code to the button that will trigger the access to this page. You can then copy the code and insert it in the footer or other places that you might want.

## 12. How to delete an user?

Users cannot be deleted in a GLI-19 certified casino software, under normal circumstances.

They can only be disabled, preventing them from using their accounts.

If you need the option to delete an user, please contact us.

## 13. How do I disable an user?

Users can be disabled by going to USER MANAGEMENT -> LIST USERS and click DISABLE. You will see a popup and you will enter the disable reason and expiration date. The user will NOT be notified that he was disabled

## 14. How do I submit my website to Google?

You should discuss with a SEO specialist or look for a tutorial on Youtube, since this is not an action that you need to do from our software.

## 15. How do I edit meta (SEO) data for landing page HOME?

You can do that from admin panel -> CONTENT MANAGEMENT -> Content Pages List -> and then look for the page with shortname “landing\_home” and click to Edit its data.

## 16. How do I edit meta (SEO) data for landing page GAMES?

You can do that from admin panel -> CONTENT MANAGEMENT -> Content Pages List -> and then look for the page with shortname “landing\_games” and click to Edit its data.

## 17. How do I disable all the games of a certain 3<sup>rd</sup> party provider/aggregator?

You can disable a certain aggregator/provider by going to admin panel -> GAMES MANAGEMENT -> GAMES PROVIDERS and click “Disable”.

When you do this, you disable the provider/aggregator.

The players cannot see the games of that provider in the lobby even if the games are Enabled inside GAMES MANAGEMENT -> LIST ALL GAMES.

The players cannot play a game if they know the game opening URL.

The players cannot place new bets in the games of that provider.

## 18. How do I disable just some games of a certain 3<sup>rd</sup> party provider/aggregator?

You can disable a certain aggregator/provider by going to admin panel -> GAMES MANAGEMENT -> LIST ALL GAMES and click “Disable”.

When you do this, you disable that certain game.

The players cannot see the game of that provider in the lobby.

The players cannot play a game if they know the game opening URL, if the game is disabled

The players cannot place new bets in the disabled game.

In the same page you will find buttons to MASS DISABLE or MASS ENABLE all the games of a certain provider.

Priority for a game to function is:

1)The provider/aggregator must be enabled

2)The game must be enabled
